

PACEMAKER CABLES: AUTOCLAVABLE / NON-DISPOSABLE

CardioVasculair
Uw partner in cardiovasculaire en ambulante diagnostiek
Your partner in cardiovascular and ambulatory diagnostics

Designed to connect to most external cardiac pacemakers currently available. Choose from the multiple designs to meet your personal pacing needs. Each cable is ± 2.5 metres long and all connectors and terminals are color coded for easy identification. The cables are autoclavable: easy to perform and no hazardous chemicals! **With over 30 years of clinical experience, you will find these cables to be trustworthy and user friendly!**

Artikelnr.	Ref.nr.	CONNECTION: DEVICE END			CONNECTION: PATIENT END			AUTO-CLAVABLE	FERRITE BEAD*	Labelled

* Moulded Ferrite Bead for increased EMI-protection (a ferrite bead is a passive electric component used to suppress high frequency noise in electronic circuits)

PACEMAKER ADAPTERS:

Artikelnr.	Ref.nr.		AUTO-CLAVABLE	FERRITE BEAD
141020	4810	Adapts standard 2mm collet terminals with fixed 1.25" spacing to accept catheters with 2mm shrouded pins.	✓	-/-
141021	4830	25.5 cm long, silicon rubber. REDEL 2 pin terminal on device end and a universal connector at the patient end.	✓	✓
141022	4840	25.5 cm long, silicon rubber. REDEL 2 pin terminal on device end and a Redel 2 female connector at the patient end.	✓	✓

PACEMAKER CABLES: SINGLE USE / DISPOSABLE

Artikelnr.	Ref.nr.		
141001	4220	2 mm connector pins (on device end) with Alligator clips (on patient end)	
141002	4221	(no photo) 2 mm pin Unipolar (on device end) with Alligator clips (on patient end)	
141003	4255	Redel connector (on device end) with Alligator clips (on patient end)	

For your connection of temporary myocardial electrodes and external pacemakers we offer:

- highly flexible cable for save connection with most standard external pacemakers
- particularly designed for short temporary myocardial electrodes (60 cm length) that require a suitable extension cable
- offers superior reliability during stimulation and monitoring
- prevents failure of the electrical conductivity (cable break) caused by previous use or by reprocessing treatments
- particularly convenient collet adapter at the patient side: Collet (screw-down) connector accepts pacing wires and pins of diameters from 0.2 mm to 1.1 mm

Artikelnr.	Ref.nr.	External pacemaker connection:		Electrode connection:	
161000	30.2001	2 mm pin		collet connector	
161001	30.2011	2 mm pin, shrouded		collet connector	
161002	30.2021	REDEL connector		collet connector	

Fields of application : Cardiac Surgery / Cardiac ICU
Dimensions : standard length 200 cm
Material : wire: Stainless steel / insulation: TPE
Packaging : sterile, single packed in packaging unit of 10 pcs each

CardioVasculair B.V.
Postbus 1008, 5900 BA VENLO

Minimum purchase quantity: 20 pcs
