

MEDIDRAIN®

SILICONE CAPILLARY DRAIN

Silicone Capillary Drains are the alternative choice to the conventional Latex Penrose Drainage.

The particularly soft and tissue-friendly material provides reliable drainage flow even in collapsed condition

Distinct capillary structures guarantee a safe drainage

FEATURES:

- no obstruction by blood or secretion
- daily withdrawal to avoid tissue adhesion can be dropped in contrast to latex drainages
- latex-free - protects nursing staff and patients against potential latex allergy
- lumen wall with asymmetric grooves for reliable drainage flow
- radiopaque

MEDIDRAIN®

Description	Ref.No.	Length	Diameter
MEDIDRAIN®, short	01.2936	30 cm	6 mm
	01.2938	30 cm	8 mm
	01.2930	30 cm	10 mm
	01.2932	30 cm	12 mm
MEDIDRAIN®, long	01.2956	50 cm	6 mm
	01.2958	50 cm	8 mm
	01.2950	50 cm	10 mm
	01.2952	50 cm	12 mm

MEDIDRAIN® - Type: flat

Description	Ref.No.	Length	Width
MEDIDRAIN®, flat	01.2940	30 cm	40 mm

STERILE | EO | LATEX-FREE

SPECIFICATIONS:

- Material:
Capillary Drain:..... Silicone, radiopaque
- Packaging:.....double packed, sterile
Unit:.....25 EA/ box
